HYDRAULIC ROLLER LIFTER KITS

Edelbrock's high performance hydraulic roller lifters for small-block Chevy, "W-series" Chevy, big-block Chevy, big-block Chrysler and small-block Ford are the perfect match for street and high performance applications. With unsurpassed tolerance capable of high rpm power, these precision self-aligning retro-fit hydraulic roller lifters are designed for use in early model non-roller engine blocks originally equipped with conventional lifters. Sold in complete sets.

- Lifters are made from 86L20 steel and the case is heat-treated to 50-52c hardness to a depth of .010" - .015"
- Each lifter is tested and assembled to high quality standards
- Lifters are tied together for precision alignment
- Tight ID tolerances allow for better control at higher RPM
- Outside finish has a R.E.M. micro finish at 2 RMA
- Lifters are designed for easy drop in replacement without block modifications
- Highest quality lifters at a competitive price
